Assignment 2

August 16, 2020

1 For Loop

Write a program that ask for a number k, then print out:
Example:

    Enter a number: 10

    $>>> 1, 2, 3, 4, 5, 6, 7, 8, 9, 10$

1.1 While Loop

Write a program that asks the user keep inputting integers. Then when the user input a -1, the program will print all the previously inputted integers. (Hint, use a list to store the inputs, and use a while loop to repeat the input!)
Example:

    Enter an integer : 1

    Enter an integer : 3

    Enter an integer : 4

    Enter an integer : -1

$>>> [1, 3, 4]$
